About the speaker: Dr. Anil Shrestha's primary research area is integrated vegetation management in agricultural and non-agricultural systems. Particular research interest includes weed biology and ecology; crop-weed competition; herbicide-resistance management; cropping systems; agroecology; and organic farming. He teaches undergraduate courses in weed science, and vineyard ecology and organic

production; at the graduate level, teaches biometrics, data analysis using the R system. He also serves as an associate editor of *Agronomy Journal*, academic editor of *PLOS ONE*, and as an editorial board member of the *Journal of Crop Improvement* and *Journal of Sustainable Agriculture*. Dr. Shrestha joined Fresno State in 2008. For further information, his website is: <http://www.fresnostate.edu/jcast/weedscience>
