Authentication to Production PeopleSoft instances via CAS

- ## What is changing?

Authentication process for users who login directly into PeopleSoft Campus Solutions (CS) and/or Human Resources (HR) instances.

- ## Why is this change necessary?

In an effort to improve campus Information Systems security and secure access to sensitive data that we maintain in PeopleSoft, CAS authentication for our production and non-production Campus and Human Resource PeopleSoft instances are necessary. With the changes in place, 2-Step Verification will be part of the signon flow and provide an additional layer of security for those enrolled. In phase-1 of our plan, we activated CAS authentication for all non-production PeopleSoft instances on May 31, 2018. In phase-2, CAS authentication will be activated for all production PeopleSoft instances on June 25, 2018. For more information on 2-Step Verification process, please refer to the page at http://fresnostate.edu/technology/security/2step-verification.html.

- ## Who will see the change?

Users who login directly using the links on the "cms-index" page or bookmarked links will see this change.

- ## What relevant items will NOT be impacted by the change?

This change will not impact those users who log into the My Fresno State Portal and then access pages on PeopleSoft Campus Solutions (CS) and/or Human Resources (HR) instances via any links. The 2-Step Verification user experience that applies to any users who are enrolled in 2-Step Verification, will not change.

- ## Change Summary and required action

Current functionality

➢ Currently the users see links on the "cms-index" page for logging into PeopleSoft Campus Solutions (CS) and/or Human Resources (HR) instances.

Campus Solutions

Release	Instance
8.55.13	CFRPRD (Production)

Human Resources

Release	Instance
8.55.13	HFRPRD (Production)

➢ Currently the users see the "blue" PeopleSoft signon page while logging in to PeopleSoft Campus Solutions (CS) and/or Human Resources (HR) instances:

Post change functionality

➢ The users will see additional links on the "cms-index" page for logging into PeopleSoft Campus Solutions (CS) and/or Human Resources (HR) instances without using CAS authentication.

Campus Solutions

| Release	Instance
8.55.13	CFRPRD (Production) (Non-CAS Signin)

Human Resources

Release	Instance
8.55.13	HFRPRD (Production) (Non-CAS Signin)

Action required by the users:

It is strongly encouraged that users use the first link(login with CAS authentication) for extra security. However, an option is provided to cover certain scenarios where the users are unable to use CAS authentication. The second link (labelled "Non-CAS signon") will allow users to get to the direct PeopleSoft sign-on page (without CAS authentication) where the users will be able to log in using emplid and PeopleSoft password (note that PeopleSoft password and campus passwords are maintained separately).

➢ For login with CAS authentication, the users will see the familiar campus login page, similar to what is currently seen while logging into campus email and many other campus applications.

Action required by the users:
Users will still log in with individual campus username and password as before. If any user is enrolled in 2-Step Verification, you may be prompted for additional verification. However, note that the user experience for 2-Step verification will be the same as current.
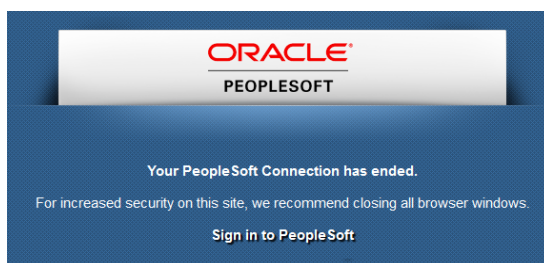

➢ For login without CAS authentication, the users will see the the "blue" PeopleSoft signon page.

Action required by the users:
Users will log in using emplid and PeopleSoft password. Note that PeopleSoft password is likely to be different from campus password.

➢ While logging out, the users will see the following page instead of being transferred to the signon page.

Action required by the users
It is strongly encouraged that you close all browser windows when you are done with your PeopleSoft session.
