

Smart Classroom/Meeting Room Digital Standard

- Epson Projector that meets current Digital Standard
- Digital Document Camera
- Blu-Ray/DVD player (HDMI output)
- Digital/analog switcher (to add digital switching capability)
- HDMI and VGA input ports available on desktop. Ports will be available next to user interface and be easily accessible.
- Extron pushbutton control of inputs to the projector, and on/off control (Current user interface remains unchanged.)
- Instructor teaching station: full-size desk with equipment cabinet, sit to stand configuration
- Surge suppressed plug strip
- Speakers, dependent on T-bar or wall mount
- Projection screen, currently pull down, with various models and sizes, dependent on room configuration. New standard to be dual use whiteboard/projection screen
- Instructors to receive digital interface cable for their display device to connect to digital HDMI port on desktop. VGA cable to be available on desktop at all times. This VGA cable has a mini plug attached for use with Audio presentations. If additional adaptors are necessary, they will be identified and supplied to faculty as appropriate; additionally, adaptors will be made available for short-term borrowing from the School/College IT Liaison and the library circulation desk.
